

 **Emperor****EmFilm**
Film Dressing

Made from latex-free, semi-permeable polyurethane film membrane and coated with a hypoallergenic acrylic adhesive, EmFilm Dressing are designed to be breathable with good oxygen and moisture vapour exchange.

Waterproof and impermeable to liquids, bacteria and viruses, the risk of infection is reduced while also enabling effective wound monitoring through a transparent film.

Protection of newly forming tissue

Fixation of primary dressings

Provision of a 'moist wound healing environment'

The patient can shower with the dressing in place

Prevention of contamination by dirt or bacteria, thus a reduced risk of wound infection

Rounded edges and consistent hypoallergenic adhesive help prevent dressing damage and early removal, reducing the number of dressing changes needed.
