

EmFilm Post-Op

Shaped Film Dressing with Absorbent Pad

Featuring a latex-free, semi-permeable polyurethane film membrane which is coated with a hypoallergenic acrylic adhesive, EmFilm Post-Op Dressings are designed to be breathable with good oxygen and moisture vapour exchange.

Waterproof and impermeable to liquids, bacteria and viruses, the risk of infection is reduced, and the dressing also incorporates an integral central pad consisting of absorbent material.

Facilitates wound healing

Provision of a 'moist wound healing environment'

The patient can shower with the dressing in place

Prevention of contamination by dirt or bacteria, thus a reduced risk of wound infection

Rounded edges and consistent hypoallergenic adhesive help prevent dressing damage and early removal, reducing the number of dressing changes needed.

EmFilm Post-Op Application Guide

Preparation:

1. Use existing clinical guidelines in preparation for the application of EmFilm Post-Op
2. Select a dressing that is of a suitable size and shape. Choose the dressing size large enough to provide a margin that adheres to dry healthy skin around the wound site

Dressing Application:

1. Peel the two white paper liners outwards from the dressing to expose the absorbent pad and adhesive border
2. Position the absorbent dressing pad centrally over the wound
3. Gently press down the adhesive border onto the skin covering the wound with the absorbent pad
4. As indicated by the blue strip remove the transparent release film on the back of the dressing from the centre outwards
5. Smooth the entire dressing from centre towards the edges using gentle pressure to enhance adhesion
